SUMMARY

Business Intelligence & Data Analytics specialist with a B.Com in Accounting and 2+ years of experience transforming raw data into actionable insights through automated reporting systems, executive dashboards, and data-driven decision frameworks. Expert in designing BI solutions that bridge technical implementation with business impact, reducing reporting cycles by 10x while enabling sales and operations teams to make faster, informed decisions. Combines strong business acumen with technical expertise in SQL, Python, Power BI, and modern data stack technologies.

EXPERIENCE

Nile for Cables and Electronics , BI & Sales Data Analyst	Giza, Egypt
- Reduced reporting cycle from days to hours by designing and deploying a semi-realtime automated reporting system, directly improving sales team responsiveness and strategic decision-making - Led quarterly sales performance evaluations using consolidated KPIs, providing actionable insights that drove revenue-focused business decisions - Built executive dashboards supporting sales forecasting and real-time KPI monitoring, enabling stakeholders to track performance without manual data pulls - Designed end-to-end ETL pipelines using PostgreSQL and Dolt (version-controlled SQL database), ensuring data integrity and audit trail for critical financial metrics - Developed a local AI chatbot using open-source LLMs for natural language querying of business data, empowering non-technical stakeholders to self-serve analytics	Nov 2024 – present 1 year 7 months
Samsung Innovation Campus , Data Engineer	Giza, Egypt
- Developed scalable data processing workflows using Apache Spark and Kafka, supporting business intelligence and analytical use cases - Performed exploratory data analysis and feature engineering to enable data-driven business insights - Deployed production data workflows on AWS cloud infrastructure (EC2, S3), ensuring reliable and cost-efficient operations	July 2024 – Oct 2024 4 months

PROJECTS

dbt Data Warehouse – Star Schema & Analytics Layer
- Built star schema with 15+ dbt models (SCD Type 2, incremental processing) achieving 99.9% data quality Business Impact: Reduced query complexity by 70%, eliminated manual data prep, enabled self-service analytics
Atlas Analytics Platform
- Built full-stack platform with Python backend, automated ETL, role-based dashboards on AWS Business Impact: Enabled data-driven decisions across 3 departments, reduced manual reporting by 80%
Airflow ETL Pipeline – Multi-Source Data Orchestration
- Designed 4 production DAGs with dependencies, dynamic mapping, retry logic for 3 API sources Business Impact: Fully automated daily/weekly ingestion with zero manual intervention
Agentic AI Workflow – Multi-Agent DataOps Automation
- Built orchestrator-pattern multi-agent system with 5 specialized agents and persistent memory Business Impact: Cut pipeline failure resolution time by 70%, automated 90% of routine monitoring
AWS Cloud Data Pipeline – Serverless ETL with IaC
- Deployed serverless ETL: S3 data lake + Glue + Athena + Step Functions via Terraform IaC Business Impact: 90% cost reduction vs traditional infra, sub-second query performance, zero server management
Kafka Streaming Pipeline – Real-Time Data Processing
- Implemented event-driven architecture with Kafka producers, consumer groups, windowed aggregation Business Impact: Sub-second data latency, automated threshold alerting, real-time operational visibility

SKILLS

BI & Data Visualization: Power BI, DAX, Tableau, Excel, Streamlit, Plotly, Dash
Data Analysis & Interpretation: Statistical Analysis, Data Mining, Business Insights, KPI Development, Trend Analysis, Predictive Modeling
Data Pipeline & Architecture: ETL/ELT Pipelines, Apache Airflow, dbt, Apache Spark, Kafka, Data Modeling (Star Schema), PostgreSQL, MySQL
Cloud & Infrastructure: AWS (S3, Glue, Athena, Lambda, Step Functions, EC2), Terraform, Docker, Docker Compose, Linux Server Administration, Nginx, GitHub Actions (CI/CD)
Programming & Scripting: Python, SQL, Bash, JavaScript, TypeScript, HTML/CSS
AI & Machine Learning: LangChain, LangGraph, Hugging Face Transformers, Scikit-learn, TensorFlow, NLP, Local LLM Deployment
Data Quality & Monitoring: Great Expectations, Data Validation, Schema Testing, Anomaly Detection, Pipeline Monitoring
Automation & Tools: Git, n8n, OpenClaw, KiloCode, Hermes, Dolt, Jupyter, VS Code

EDUCATION

Al-Azhar University, Accounting & Business Management

Sept 2019 – June 2023

Bachelor of Commerce

- Self-taught in programming, data engineering, and cloud technologies through professional certifications and hands-on projects
- Coursework in financial accounting, cost accounting, managerial accounting, business statistics, and financial statement analysis

CERTIFICATIONS

Google Data Analytics Professional Certificate

- Data cleaning, analysis, visualization, and storytelling using spreadsheets, SQL, Tableau, and R

IBM Data Engineer Professional Certificate

- ETL pipelines, data warehousing, big data technologies (Spark, Hadoop, Kafka), and cloud deployment

IBM Data Science Professional Certificate

- Machine learning, data analysis, Python, SQL, and applied data science capstone projects

Samsung Innovation Campus Big Data Engineering Certificate

- **Top Achiever (#1)** in the Big Data Engineering track
- Intensive training in big data infrastructure, distributed computing, and data engineering fundamentals

AWS Certified Data Engineer – Associate

- AWS data engineering stack – S3, Glue, Athena, Lambda, Step Functions, and Terraform IaC (In Progress)

Master of Business Administration (iMBA)

- University of Illinois Gies College of Business
- Program includes specializations in Business Analytics, Financial Management, Strategic Leadership, and Managerial Economics
