SUMMARY

Business Analyst with a B.Com in Accounting and 2+ years of experience at the intersection of business strategy and data. Proven ability to elicit stakeholder requirements, define KPIs, and translate complex business problems into actionable recommendations that drive revenue and operational efficiency. Differentiator: deep hands-on proficiency in SQL, Python, Power BI, and ETL — enabling me to not only gather requirements but also validate them against real data, prototype solutions, and measure outcomes independently. Currently pursuing CBAP and SAP Business Analyst certifications.

EXPERIENCE

Nile for Cables and Electronics , BI & Sales Data Analyst - Gathered requirements from sales leadership and designed a semi-realtime automated reporting system, cutting reporting cycles from days to hours and improving decision-making speed - Facilitated quarterly business reviews with cross-functional stakeholders, consolidating KPIs into actionable recommendations that drove revenue-focused decisions - Elicited executive reporting needs and delivered interactive Power BI dashboards for sales forecasting and real-time KPI monitoring, eliminating manual data pulls across 3 departments - Defined data quality requirements and built end-to-end ETL pipelines using PostgreSQL and Dolt, ensuring audit compliance for critical financial metrics - Conducted stakeholder interviews to identify data-accessibility pain points, then developed an AI-powered natural-language query tool using open-source LLMs, enabling non-technical users to self-serve analytics	Giza, Egypt Nov 2024 – present 1 year 9 months
Samsung Innovation Campus , Data Engineer - Defined business requirements for BI and analytical use cases, then built scalable data processing workflows using Apache Spark and Kafka to deliver on them - Performed exploratory data analysis and translated findings into business recommendations presented to stakeholders for review - Documented deployment requirements and delivered production workflows on AWS (EC2, S3), ensuring reliable and cost-efficient operations	Giza, Egypt July 2024 – Oct 2024 4 months

PROJECTS

Customer Segmentation & Retention Strategy — E-Commerce - Defined the business problem with marketing stakeholders, then analyzed 500K+ transactions using RFM analysis, cohort retention, and purchasing pattern techniques Business Impact: Identified 3 high-value segments (68% of revenue), delivering a data-backed business case for targeted campaigns that improved retention by 23%
Executive KPI Dashboard — Sales Performance Monitoring - Elicited requirements from executive stakeholders and built an interactive Power BI dashboard tracking 15+ KPIs (revenue, conversion, sales velocity, territory performance) Business Impact: Replaced a 2-day manual reporting cycle with real-time access, enabling faster decisions on under-performing territories
Churn Risk Analysis — Business Case & Retention Strategy - Built a predictive model (84% accuracy) using Python (scikit-learn, pandas) to identify at-risk customers and quantify churn drivers Business Impact: Presented top 5 churn drivers to stakeholders, enabling proactive retention strategies that reduced churn by an estimated 15%
A/B Testing & Conversion Optimization — E-Commerce Checkout - Designed 3 A/B tests for checkout flow optimization using statistical hypothesis testing (t-tests, chi-square) Business Impact: Validated 18% conversion lift, projecting \$2.3M annual revenue increase — presented findings to product stakeholders
Data Warehouse & Self-Service Analytics — Star Schema Design - Gathered analytics requirements from business users and built a star schema with 15+ dbt models (SCD Type 2, incremental processing) achieving 99.9% data quality Business Impact: Reduced query complexity by 70%, eliminated manual data prep, enabled self-service analytics
Atlas Analytics Platform — Cross-Department BI Solution - Gathered requirements from 3 departments and delivered a full-stack analytics platform with role-based dashboards on AWS Business Impact: Enabled data-driven decisions across 3 departments, reduced manual reporting by 80%

SKILLS

Business Analysis & Requirements: Requirements Elicitation, BRD/FRD Documentation, User Stories, Use Cases, Gap Analysis, Process Mapping (BPMN), Stakeholder Management, Feasibility Studies, UAT Coordination

Data Analysis & Business Intelligence: SQL (Advanced), Python (pandas, NumPy, scikit-learn), Statistical Analysis, A/B Testing, Hypothesis Testing, Regression Analysis, Customer Segmentation, Cohort Analysis, RFM Analysis

Data Visualization & Reporting: Power BI (DAX, Power Query), Tableau, Excel (Pivot Tables, VBA, Power Pivot), Plotly, Matplotlib, Seaborn

Business & Domain Expertise: KPI Development, Sales Analytics, Financial Analysis, Marketing Analytics, Churn Analysis, Forecasting, Business Storytelling

Data Engineering & Databases: PostgreSQL, MySQL, ETL/ELT Pipelines, Apache Airflow, dbt, Data Modeling (Star Schema), Data Warehousing

Programming & Scripting: Python, SQL, Bash, JavaScript, Git

Cloud & Tools: AWS (S3, Glue, Athena, Lambda), Docker, Jupyter, VS Code, Google Sheets, BigQuery

EDUCATION

Al-Azhar University, Accounting & Business Management

Sept 2019 – June 2023

B.com

- Self-taught in data analysis, SQL, Python, and business intelligence through professional certifications and hands-on projects
- Coursework in financial accounting, cost accounting, managerial accounting, business statistics, and financial statement analysis

CERTIFICATIONS

Certified Business Analysis Professional™ (CBAP®) Specialization

- In Progress — Comprehensive business analysis frameworks, requirements elicitation, management, and evaluation

SAP Business Analyst Professional Certificate

- In Progress — SAP enterprise systems, business process integration, and data-driven business modeling

Google Data Analytics Professional Certificate

- Data cleaning, analysis, visualization, and storytelling using spreadsheets, SQL, Tableau, and R

IBM Data Science Professional Certificate

- Machine learning, data analysis, Python, SQL, and applied data science capstone projects

IBM Data Engineer Professional Certificate

- ETL pipelines, data warehousing, big data technologies (Spark, Hadoop, Kafka), and cloud deployment

Samsung Innovation Campus Big Data Engineering Certificate

- **Top Achiever (#1)** in the Big Data Engineering track
- Intensive training in big data infrastructure, distributed computing, and data engineering fundamentals

Master of Business Administration (IMBA)

- University of Illinois Gies College of Business
- Program includes specializations in Business Analytics, Financial Management, Strategic Leadership, and Managerial Economics
